

35388 servers, 114,604 versions
in twelve months

30.1%

of all versions come from
100 of 20,540 namespaces

1.4%

of declared variables name an
unflagged credential (19.9% permissive)

23.0%

of coded tool descriptions say
when to choose the tool

59.3%

of servers never tag a release,
so version counts mislead

Model Context Protocol server ecosystem, frozen 24 September 2026
